

Wine Glass Holder

Notes:

- 1. Thickness: ~3/4 inches.**
- 2. Drill all holes, then do 1/4" roundover on all edges.**
- 3. Cut slots.**
- 4. Sand and finish.**

Use solid wood, or a decorative glue-up as shown (which is cherry and purpleheart.)

Tip: Always put on and remove diagonally opposite glasses at the same time. (Don't ask how I know this.)
